Chap No./Document No.	Title
S1000D Issue 4.2	International specification for technical publications using a common source database

1 Introduction

This patch updates chapters 3.9.5.2.16 and 3.9.5.2.16.1 to match the Issue 4.2 Front Matter (FM) package and to minimize duplication of information by referring to the package instead of providing the same XML markup in both the package and the specification.
